

# Algicides

## AG-500, Algicide and superconcentrated bactericide

- **Function**
- **Format**
- **Technical sheet**
- **Evaluations**

- **Function**

Eliminate and control all types of algae: white, green, black and their spores.

Prevents the appearance of algae in the walls, soil and water of the pool. Effective for shock and maintenance treatments.

With immediate effect once it is in contact with water and has great residual action.

It prevents the sealing of the filter and pumps in the purification installations.

Great solubility and without producing foam in its contact with water.

# AG-Salin, Algicide and superconcentrated bactericide for saline electrolysis

- **Function**
- **Format**
- **Technical sheet**
- **Evaluations**

- **Function**

Eliminate and control all types of algae: green, white, black and their spores.

With bactericidal action, it disinfects and clarifies the water.

Thanks to its neutral pH it is respectful with the skin and is especially suitable for children's pools. Specially designed for pools with saline electrolysis, protecting and increasing the life of the electrochlorinator.

It has inhibitors of lime formation, avoiding calcification in filters and corrosion in metal parts.

Compatible with all types of disinfection systems, enhances the action of the disinfectant.

- **Format**

- 5L (ARV0150)
- 20L (ARV0173)
